## **WE GUARANTEE**

We guarantee our stock to be true to name. No better bulbs can be bought at any price. If any customer receives stock that proves not true to name at blooming time, it is the result of an accident; in such case we will send the customer stock of the variety ordered in the grade sent out in the first instance. He may keep the bulbs first received.

Promptly upon receipt of the bulbs the package and each individual bag within it should be opened so as to give the air access to the bulbs. A disregard of this point may impair their blooming power.

All bulbs we send out will grow and bloom under ordinary conditions, but we have no control over their environment and the care they receive after they pass out of our hands. We therefore cannot assume responsibility for the customer's failure to succeed with them, either on account of unfavorable weather or soil conditions, improper planting, neglect, moles or mice.

## **TERMS OF SALE**

All bulbs will be packed with special care, and arrival in perfect condition is guaranteed. If there are any delays in delivery or the shipment does not seem intact, we shall appreciate prompt advice. **25 bulbs of one variety will be priced at the 100 rate, 6 at the dozen rate.**

## **FREE DELIVERY**

On orders accompanied by cash we deliver free to all points east of the Mississippi River.

Address All Orders and Communications to  
**ZANDBERGEN BROS., Inc.**  
**"TULIPDOM"**

Oyster Bay, N. Y.

Telephone: WALnut 2-0573

## **TULIP CULTURE**

Tulips should not be planted where they have been grown for two years previously. They do best in fresh soil or in beds where the soil has been changed. Growing them in the same place for more than two years will lead to failure in the end.

Do not use fresh stable manure at planting time for it is injurious to the roots. Well-rotted manure will prove beneficial. Bonemeal or dried sheep manure also can be used, about three handfuls to the square yard. This must be thrown on top of the soil before planting.

Nearly all Tulips should be planted outside about 5 inches deep and 6 inches apart, according to the size of the bulb. They should be planted four to six weeks before severe frost sets in. For best results, do not mulch them until after the soil has become frozen, to keep out mice, etc., and do not mulch them too heavily; 1/2 inch will prove quite enough. Old cow manure or peat moss may be used for this purpose.

\*If flowers are not cut for indoor decoration, be sure to cut them as soon as they fade. Do not leave petals lie on ground.

When leaves have dried up, cut them off. If you lift them, place them in a cool spot to dry. When dry, remove roots and old loose skin. Store in dry, airy place.

## HOW MANY BULBS TO ORDER FOR BEDS OF A SPECIFIC SIZE

Below we give the number of bulbs needed to plant a circular bed of dimensions as stated. Plant outside rows first, and place three inches from edge of bed.

Diameter of bed	6 in. apart	8 in. apart	12 in. apart
3 feet	28	16	7
4 feet	48	27	12
5 feet	80	44	20
6 feet	112	64	28
7 feet	152	87	38
8 feet	200	113	50
9 feet	256	143	64
10 feet	320	177	80
11 feet	380	214	95
12 feet	452	255	113
13 feet	528	299	132
14 feet	612	347	153
15 feet	704	398	176
16 feet	804	453	201
17 feet	904	511	226
18 feet	1016	573	254
19 feet	1132	638	283
20 feet	1256	707	314

To arrive at the number of bulbs required for an oval bed, add the length and breadth and divide by two using the result as the diameter in above table. A bed 6 feet wide by 8 feet long will require the same number of bulbs as a round bed 7 feet in diameter. ( $6 + 8 = 14$ ; divided by 2 gives 7.)

**Should we be sold out of the varieties ordered, may we substitute similar or better ones (at no extra cost to you)?**

An Asterisk (\*) preceding the name indicates that it may be successfully forced. The figure following indicates the relative time of flowering. The variety which, in our opinion, is the choicest of its class is underlined.

## DARWIN TULIPS

### Red and Cherry-Rose

	per doz.	per 100
<u>Cheyenne 3.</u> Carmine, orange-red edged flower, strong stem. Height 28 inches. ....	\$ 1.60	\$ 12.00
